

**Presentation: Technology for Pictures  
from the South Bay Cruising Club  
<http://www.sbccsail.org/>**

April, 2012  
Rich Troy

# Agenda

- What is the Best Camera you can own?
  - Food for thought
- Intro to Geotagging Pictures
  - Adding another dimension of fun to pictures
- Intro to Underwater Photography
  - From shirt pocket to snorkeling, SCUBA, etc
- Summary

## Introducing Rich Troy for these topics

- Not a professional; an 'advanced amateur'
- Did the SBCC 2006 yearbook cover photo
- Likes Apple iProducts and Nikon products
- Enjoys taking colorful scenic pictures

# South Bay Cruising Club

Celebrating 55 Years in 2006

**Next Topic:**

**What is the Best Camera you can own?**

## Question:

# What is the Best Camera you can own?

- It's a hotly debated topic
  - Nikon? Canon?
  - DSLR? Lens built in or interchangeable lenses?
  - Film? 35mm? Medium Format?

## Question:

# What is the Best Camera you can own?

- Answer: It's the camera that is with you when you want to take "that" picture
  - Some moments aren't repeated ("I wish I had a camera then")
- Example: Apple iPhone has been the top contributor to Flickr
  - Flickr = public website for sharing pictures with 60 million photographers and 5 billion photos
- Suggestion: Sometimes small cameras are better... less to carry; easier to use

# **Next Topic: Intro to Geotagging**

# Intro to Geotagging

- Enables pictures to be displayed on a map, showing where the picture was taken
- Geotagging adds GPS data to an item, like a digital picture
- GPS data can be added by the camera or by picture editing software, if capable
- Some smart phones and tablets can take pictures with geotagging and then display the pictures on a map
  - Examples: iPhone, iPad, etc

# How to see geotagged pictures displayed on a map (iPhone/iPad)

- Run “Photos” app

- Select “Places”
- Note: Pictures taken with iPhone and iPad are geotagged automatically

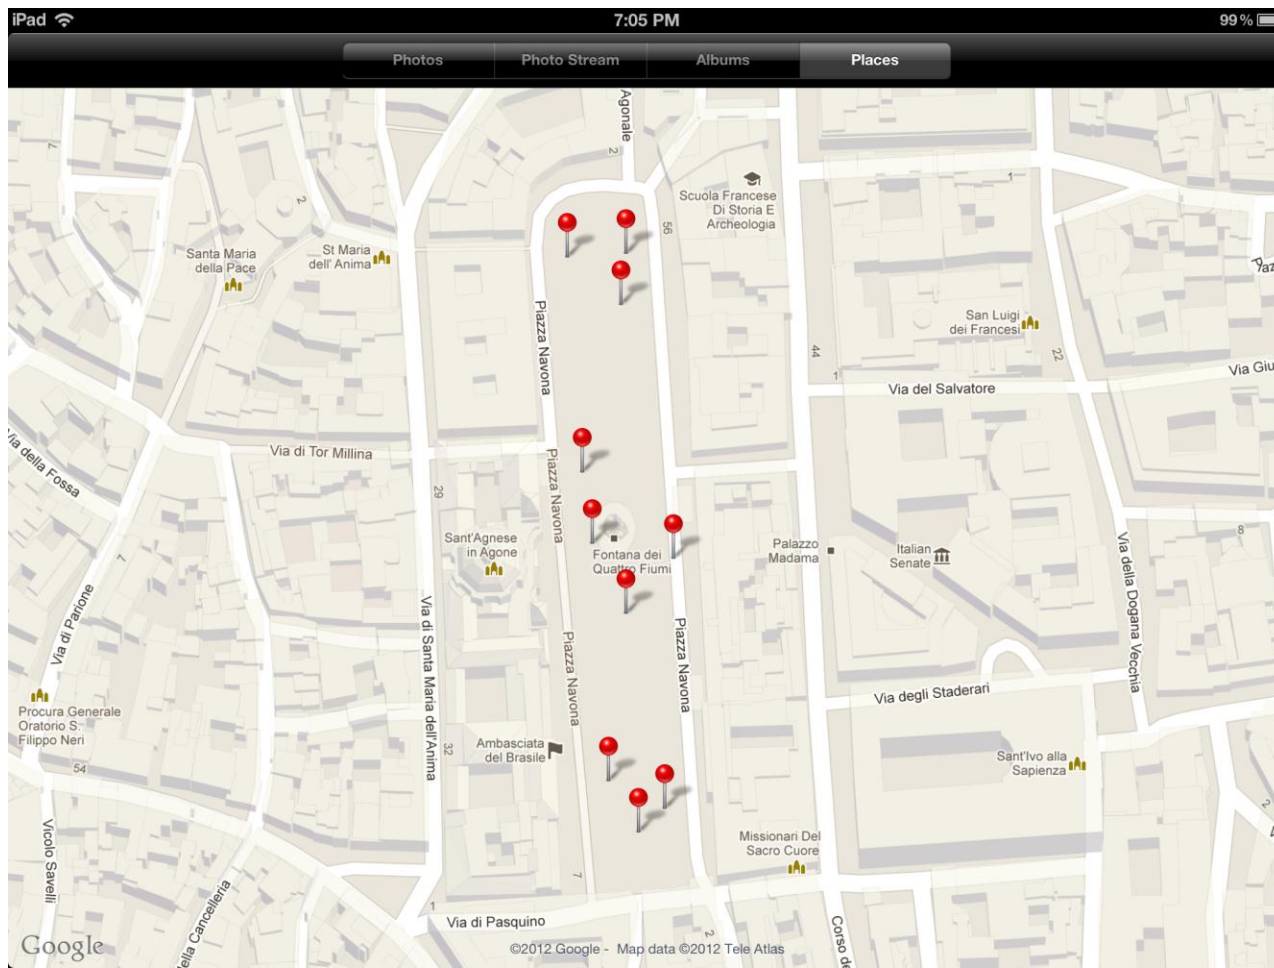

# Demo (iPhone/iPad display): Geotagged pictures on a world map

# Demo (iPhone/iPad display): Geotagged pictures in Italy Venice, Florence Rome

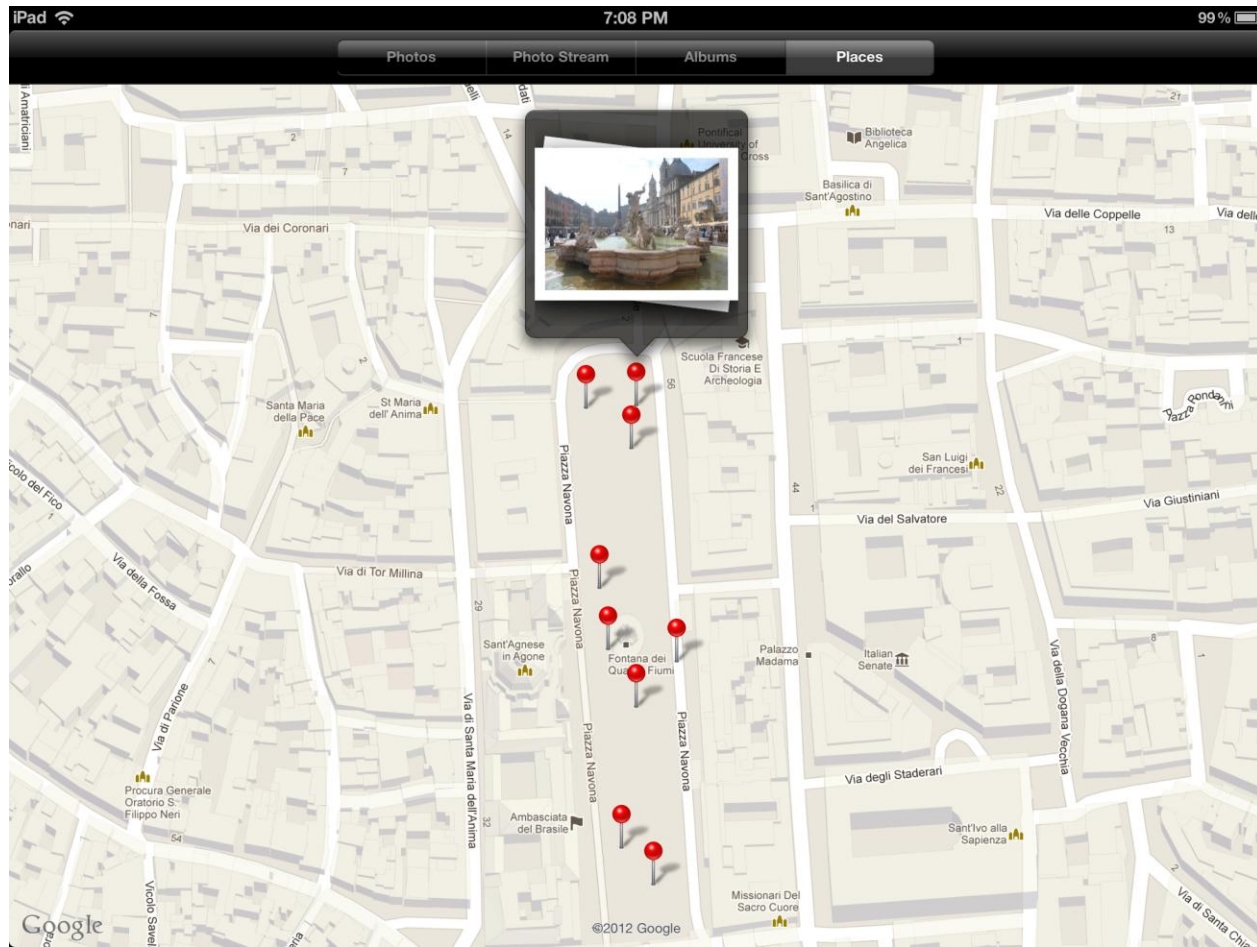

# Demo (iPhone/iPad display): Geotagged pictures in Rome, Piazza Navona

# Demo (iPhone/iPad display): Geotagged pictures in Rome, preview

# Demo (iPhone/iPad display): Geotagged pictures in Rome, preview

# Demo (iPhone/iPad display): Geotagged pictures in Rome

- Now we know where this picture was taken!

# Geotagging technology:

## EXIF Data in a JPG

- EXIF = Exchangeable Image File Format
  - Holds information like GPS, date, time, etc
- JPG or JPEG = Joint Photographic Experts Group
  - Popular file format for digital pictures
- Camera -> takes picture -> saves to file
  - EXIF is written into the saved picture file

# Geotagging technology:

## Examples of EXIF data in a JPG picture

### Properties - EXIF

#### File

Comment

#### Camera

Make	NIKON
Model	COOLPIX P6000
Orientation	Upper Left
X resolution	300/1
Y resolution	300/1
Resolution unit	inches
Software	COOLPIX P6000V1.2
Date/time	10/15/2010 4:36:29 AM
YCbCr positioning	co-sited

#### Image

Image description	
Artist	
Copyright	
Exposure time	0.00300842 s
F-number	f/5.7
Exposure program	Normal Program
ISO speed ratings	ISO 64
Date/time original	10/15/2010 4:36:29 AM
Date/time digitized	10/15/2010 4:36:29 AM
Component config	YCbCr
Compressed BPP	4
Exposure bias value	0.00 eV
Max. aperture value	f/2.7
Metering mode	Pattern
Light source	unknown
Flash	Flash did not fire, compulsory fla...
Focal length	6 mm
User comment	shutter speed is 3/1000 sec
Colorspace	sRGB
Pixel X dimension	4224
Pixel Y dimension	3168
Interoperability IFD	1292
Scene type	A directly photographed image
Custom Rendered	Normal process
Exposure mode	Auto exposure
White balance	Auto white balance
Digital zoom ratio	0
Focal length in 35mm film	28 mm
Scene capture type	Standard
Gain control	None
Contrast	Normal
Saturation	Normal
Sharpness	Normal
Subject distance range	unknown

#### GPS

GPS Latitude Reference	North latitude
GPS Latitude	41.53.9872' 0"
GPS Longitude Referen...	East longitude
GPS Longitude	12.28.3888' 0"
GPS Altitude Reference	Sea level
GPS Timestamp	9:35:57
GPS Satellites	05
GPS Map Datum	WGS-84
GPS Date Stamp	2010:10:15

#### Miscellaneous

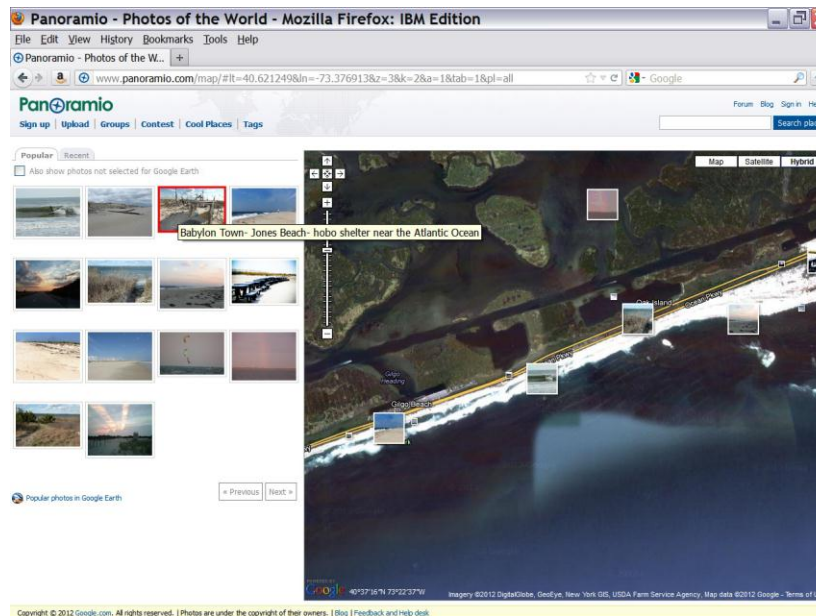

Exif version	2.2
FlashPix version	1.0
File source	DSC
GPS Version ID	(2.2.0.0)
White balance	Auto

#### Nikon Maker Notes

Quality	FINE
Color Mode	COLOR
Image Adjustment	NORMAL
White balance	Auto
Digital zoom	1
Image sharpening	NORMAL
Focus mode	AF-S
ISO selection	AUTO
Adapter	OFF
Manual focus distance	Infinity
AF Focus	Bottom
Contrast	NORMAL
Noise reduction	OFF
Saturation	NORMAL

# Geotagging on websites

- Photo sharing communities use GPS
  - Panoramio (my favorite), locr, Flickr
  - Pictures on a map can be shared, browsed
  - This example is west of Gilgo Heading

# Geotagging software: Picasa (free)

- Picasa lets you set or adjust the location where a photo was taken, and displays it in an embedded Google Map
  - <http://picasa.google.com/>
  - Needs an Internet connection

# Geotagging Cameras

- Camera phones: iPhone, Android, etc
- Cameras & pocket cameras: Nikon, Canon, etc
- Examples here today:
  - Nikon P6000 (pocket camera)
  - Panasonic Lumix (pocket camera)
  - iPhone 4S, iPod Touch, iPad (new)

# Buying Considerations: Geotagging Cameras

- Cost, picture quality, megapixels, features, options, etc.
  - If no GPS fix, what GPS info is put on picture?
    - Some cameras put nothing
- Speed of GPS fix
  - Older systems take 11 Minutes; newer 3 or less
    - From power on to GPS fix ready
- GPS adds to battery drain
  - Consider buying one or more spare batteries
  - May need to manually turn off GPS if not using camera; some cameras are automatic

# Geotagging risks!

- Public posts of geotagged pictures reveal
  - Your location
  - The date & time taken
- Celebrities have mistakenly revealed their home locations
- Thieves have used the information
  - Exact location of a valuable item for sale
  - Date & time a home is empty (vacation)

# Geotagging summary

- Geotagging pictures are available from many cameras and phones
- Geotagged pictures can be seen on a map on phones, tablets (ex: iPad), websites, and desktop software
- It can add a fun dimension to pictures
- It's not expensive to get started

## **Next Topic: Intro to Underwater Photography**

# Intro to Underwater Photography

- Wide range of pricing in cameras and equipment
- Wide range of capabilities in the equipment
  - With maximum depths of 10 ft, 33 ft, 200 ft, etc.

# Taken by my compact camera

# Buying Considerations: Underwater photography

- “Waterproof” limitations of cameras & equipment
  - Depth and/or time underwater (ex: 40 ft for 60 minutes)
  - Rubber gasket seals need to be replaced from time to time
- Many compact cameras with “Waterproof” also are:
  - “Drop proof” (ex: 6.6 ft fall to plywood)
  - Maybe also “Freeze proof” (to -14F) or “Crush Proof” (to 350#)
- On compact cameras, some users report rubber gasket failures
  - My 2 year old compact camera failed; repair cost would have been ½ price of a new camera
- Make sure you understand what you can do underwater
  - Some cameras don’t allow all buttons to be used underwater

# Underwater photography summary

- “Waterproof” is available on many compact cameras
- It's not expensive to get started

## **Next Topic: Conclusion**

# Conclusion

- IF the best camera you can own is the one that is with you when you want to take the picture
- THEN maybe a compact camera with geotagging and “waterproof” is a good solution, such as:
  - Panasonic Lumix (here today)
  - Nikon AW100
  - Others
- OR maybe find a waterproof case for the phone  
😊
